#590/585/586 SERIES Pipe Guards & Bollards

These commonly seen products serve to protect dispensers and other components on a fueling island area from accidental vehicle contact. They are also used to protect small buildings, kiosks, walkways, and equipment located near drive-through areas.

We manufacture u-shaped pipe guards in 3", 4" and 6" pipe sizes. We use schedule 40 pipe as standard. Straight pipe bollards are available in a variety of round sizes 4" through 10", in schedules 10, 20 and 40. We also produce square tubing bollards in 4", 6" and 8" sizes and wall thicknesses of 1/8", 3/16" and 1/4". Bollards (round or square) may be ordered in any length. We supply these bollards and pipe guards coated on the outside with a light grey primer as standard. They are also available with powdercoated exterior.
